Rolled Tam Vong

Rolled Tonkin

Black Bamboo

Black Bamboo Border

Rolled Split Fence

Rolled Pine Brush

Notes on Maintenance:

All rolled fences are wired together using 8 gauge copper wire to prevent rusting. Can be nailed or screwed (pre-drilling recommended). Because the skin of bamboo is so resilient, they do not come with a finish applied. It is recommended to let your fence weather 6-12 months, then a marine varnish can be applied for longevity after a light pressure wash. All bamboo may develop a surface mold on the skin. This happens naturally in a moist, humid environment. If this occurs a light pressure wash will remove it. If a varnish is applied later, it will help prevent this from occurring. Longevity will depend on the conditions and the surrounding environment. Like all natural materials colors and sizes may vary.
