Eco-Flector Ordering Options

Engineered Shading Systems:

Select from Max Reflections or Low-e Shades Solar Film

VersaTrak.Track Specifications:

Head Rail: Heavy Duty Anodized 1.58" wide Aluminum Track with a 1.333" long Vertical Channel and minimum wall thickness of .045" Control End: is a smooth action 3-to-1 ratio Tilter, utilizing a #10 nickel-plated ball chain for the rotation and movement of the slats. Carriers are self-aligning, utilizing a single heavy-duty worm gear for easy and uniform rotation while riding on two self-lubricating wheels for a smooth draw. Scissor Track with removable stems for easy future service/replacement. 3 Year Warranty. *(Deduct 1-5/8" for track height to determine vane length)*

Specify Track Options:

One Way Draw – Entire stack is on the control end.

Split Draw - ½ stack is on left and ½ stack is on right.

One Way to Butt - Long Track can be made in 2 sections *(One Way to Butt - Left - One Way to Butt Right)* If inside mount provide inside opening dimension for 3/8" deduction total if sections are equal. If track section split is requested to be other than equal the 3/8" deduction will be taken off one section only.

One Way Opposite - Entire stack is at the opposite end of the controls.

Center Stack – Entire stack is in the middle of track.

Measurements:

Supply dimensions to the nearest 1/8" inch increment.

Standard Track Deductions:
