Did you know?

- 40-50% of an office's energy use comes from lighting
- Lighting retrofits reduce lighting energy consumption by up to 75%
- Most offices are using lighting technology that was designed before 1970
- lighting technology causes heat, thus higher costs for office cooling

Benefits of Lighting Retrofit:

- Decreased energy costs / lower energy bill = save \$
- Increased light quality - consistent light colour
- Greater workplace productivity
- Safety - Reduced risk of accidents
- No ripple effect from florescent lighting
- Longer bulb life (50,000+ hours)
- Lower maintenance costs
- Cash rebates from local utility company
- Reduce your carbon footprint -Go Green

With your Lighting Assessment you will get the following:

- Qualification for utility rebates
- Your current power consumption
- Your estimated power consumption after the lighting upgrade
- Your Energy Savings and Money Savings
- The time until you receive a return on your investment (fast ROI usually only 2-3 years)
- Annual savings in dollars after the retrofit, and Continued savings Year After Year
