

Applicable LEED credit information for the TorZo solid surface product line

LEED Category	Description	Possible Credits	Indure	Orient	Duram	Seeta
Environmental Quality EQ 4.4	Low or reduced VOCs in commercial interiors.	EQ 4.4 (1-pt)	Urea formaldehyde free		Urea formaldehyde free	Urea formaldehyde free
Materials and resources 4.1	Recycled content - products that have any recycled content greater than 5% of total value in project contribute to achieving points.	MR 4.1 (1-pt)	Indure is made from >65% post industrial recycled wood and <35% acrylic resin.	Orient is made from >75% post industrial FSC recycled wood and <25% acrylic resin.	Duram is made from >70% post agricultural wheat waste product and <30% acrylic resin.	Seeta is made from >70% post agricultural sun flower seed shell waste product and <30% acrylic resin.
Materials and resources 4.2	Recycled content - products that have any recycled content greater than 10% of total value in project contribute to achieving points.	MR 4.2 (1-pt)	Indure is made from >65% post industrial recycled wood and <35% acrylic resin.	Orient is made from >75% post industrial FSC recycled wood and <25% acrylic resin.	Duram is made from >70% post agricultural wheat waste product and <30% acrylic resin.	Seeta is made from >70% post agricultural sun flower seed shell waste product and <30% acrylic resin.
Materials and resources 5.1	Local/regional products, making up more than 20% of projects building materials, and that are manufactured within 500 miles of project.	MR 5.1 (1-pt)	Applies to projects based in the Northwest that are within 500 miles of "infused" products manufacturing facility in Oregon.			
Materials and resources 5.2	Of the local/regional products, use a minimum of 50% building materials extracted and manufactured within 500 miles of project.	MR 5.2 (1-pt)	Applies to projects based in the Northwest that are within 500 miles of "infused" products manufacturing facility in Oregon			
Materials and resources 6	Rapidly renewable resources defined by materials that come from plants or harvested crops within a 10 year cycle.	MR 6 (1-pt)			Duram s made from a wheat stalk product and therefore falls under rapid renewable resource.	Seeta is made from sun flower seed product and therefore falls under rapid renewable resource.
Materials and resources	FSC certified products.	MR 7 (1-pt)		Orient is made form FSC oriented strand board.
