Application Instructions for WOCA Exterior Oil :				
<ol style="list-style-type: none"> 1. Hose down the deck with plenty of water. Mix Exterior Cleaner with water in solution 1 to 2. (For extremely dirty decks, use undiluted.) Spray or brush the solution onto the deck and leave it for 5 minutes. 2. Using Deck Brush Carbide with a floor buffer, scrub dirt, stains, old finish, and oxidation away. Tough stains may require more solution and additional scrubbing. The edges are scrubbed using the Hand Brush Carbide. 3. Hose all residue off the deck with water. Leave deck to dry at least 24 hours. 4. Using the WOCA Exterior Applicator, apply Exterior Oil the deck. Let sit 5 - 10 minutes. 5. Polish the Exterior Oil into the wood decking with a floor buffer using a red or yellow pad. Polish to complete saturation. 6. Polish off all excess oil using a cloth under the buffer. Another oil application the next day may be necessary on some decks. 7. You are done! In order to retain maximum protection and beauty, it is recommended to re-oil the deck once a year.
