

Impact Series Doors

Hinged Door Features

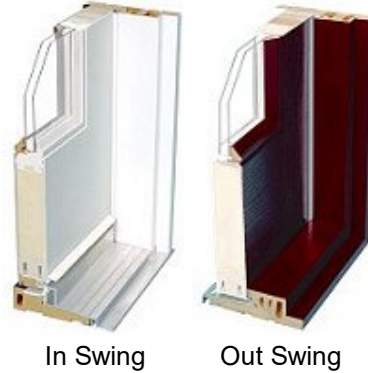

[Overall Features](#) [Glazing Options](#) [Hardware Options](#)

Frame

Frames are available in 4-9/16" or 6-9/16". Frames are made of composite material with a smooth exterior and interior finish. Jambes include screen channels. Thresholds have superior draining system to channel water away from the door.

Panel

Standard doors have smooth white exterior and smooth white interior. Pre-finished woodgrain doors are available in a wide variety of colors. Surfaces can be painted or stained to other colors if desired. The polyurethane foam core is 100% CFC-free. Strong, durable fiberglass skins will not rust, dent, split or rot. Full-length composite stiles and rails increase water and moisture protection. The bottom sweeps have two layers of weather stripping. All units are available with white internal flat grilles.

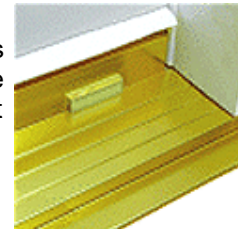

Multi-Point Lock System Our superior, multi-point lock system increases security and enhances performance by providing smooth operation. (The multi-point lock is standard on 8' units).

Weep Hole Cover

Weep-hole cover allows water to drain out, while preventing dust and dirt intrusion.

Hinged Doors with Vented Sidelights offer the same features as all hinged doors. Vented Sidelights feature a 3-point latch locking systems with a craft designed thumb-turn.
