

## Eco-Aire Pre-Qualification Questionnaire

---

**Questions for potential customers to pre-qualify them for installation or a site visit.**

1. **Does the building have a central air condition** – Eco-Aire is designed for central HVAC systems. Customers with mini-split units are not suitable for a Eco-Aire installation.
2. **Size of cooled/ heated space** – Conditioned area should be 4,000 – 15,000 sqft . larger areas would require more than one Eco-Aire units.
3. **In case of large office buildings verify how many HVAC units customer have** – Each unit will need a Eco-Aire system.
4. **Verify air duct size and shape** – the Eco-Aire is designed to be installed onto air ducts:
  - a. Rectangle air ducts with minimum size of 24” x 6”
  - b. Round air ducts of min diameter of 12”

If answers to all above questions are satisfactory, the customer is qualified for a site visit and the next is a request – Please have your HVAC maintenance person present at the time of our visit.
