info@eco-smart.com

CAPABILITY STATEMENT

Capabilities

Experts in:

- Identifying quality green construction materials, focused on U.S. made and U.S component manufactured.
- Experienced in working with designers, contractors, facilities and government to understand project requirements and work flows.
- Trained by EPA Energy Star / Green Lights to specify energy efficient lighting upgrades.
- Deep understanding of IES lighting requirements, light quality issues for indoor and outdoor applications.
- Broad knowledge base extending from lighting to structural systems, solar electric, solar water, wind power, recycled rubber roofing, flooring, and more.
- Eco-\$mart has successfully certified a number of LED lamps with the Florida Fish and Wildlife Conservation Commission for Turtle Friendly Lighting.

Differentiators

Leading the way...

- > Facilities utilizing Eco-\$mart lighting saved an average of over 70 percent of lighting and maintenance costs.
- > Customers consistently praise Eco-\$mart's on-time delivery record and support with tracking information prior to deliveries.
- > With over 20 years experience in green supply, Eco-\$mart has reliable sources for alternative materials in virtually all phases of construction.
- > Eco-\$mart offers free ROI / Life Cycle Cost calculations and free media Press Release production.
