SUNPAD

Passive Solar Water Heater

Capture the sun. Preheat your water. Reduce energy demand.

SOLAR HOT WATER, SIMPLY INTEGRATED.

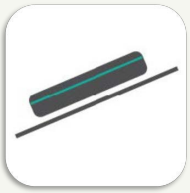

Sunpad combines solar collection and heat storage in one low-profile unit. Connect it ahead of your existing electric, gas or instantaneous water heater.

MADE IN AUSTRIA

150 lbs	LOW PROFILE	5 YEARS
Empty weight	Clean rooftop appearance	Limited product warranty

- **Fast, straightforward assembly**
  Integrated design simplifies handling and on-site assembly.
- **Low-maintenance design**
  No magnesium anode replacement. Corrosion-resistant internal components.
- **Built for outdoor exposure**
  UV-protected EPP housing and powder-coated steel mounting.
- **Flexible installation options**
  Pitched-roof and flat-roof mounting options to suit your project.

Pitched roof

Flat roof 20 degrees

Flat roof 30 degrees

U.S. configuration uses an existing backup water heater; integrated electric backup is not included. Installation, water quality, freeze protection and site suitability must follow current product instructions and local requirements.

LET THE SUN HELP HEAT YOUR WATER
